PROJECTS

SickLeaf (Group Project):

[2026 – present]

- **Tools:** Python, Scikit-learn, OpenCV, SVM, Random Forest, XGBoost
- Built AI **plant disease detector** achieving 88.6% accuracy on 20,000+ leaf images and extracted 55 features (shape, texture, color, edge) for disease classification. Implemented PCA for dimensionality reduction and model optimization and created web interface for real-time leaf image diagnosis

CookieWise AI:

[2026]

- **Tools:** JavaScript, Python, HTML, CSS, Browser Extension APIs, NLP Models
- An AI-powered browser extension that **detects cookie consent banners** and extracts privacy policy text in real time. Generates clear, plain-English summaries highlighting tracking, data sharing, and privacy risks before user consent. Provides concise alerts and detailed visual insights (e.g., data flow maps) to help users make informed, privacy-safe decisions.

EventEase (Group Project):

[2026]

- **Tools:** React.js, Node.js, Express.js, MongoDB, HTML, CSS, Nodemailer
- A web-based event management system that helps **users plan and organize events** in one platform. It supports event creation, guest list management, budget and expense tracking, vendor browsing, invitation card generation, and automated email sending to guests. Designed to simplify event planning through a centralized and user-friendly dashboard.

Rentinel (Group Project):

[2025]

- **Tools:** Spring Boot (Java), React.js, MySQL
- Developed an end-to-end system to **streamline rent tracking, tenant records, and lease management**. Automated reminders and payment logs reduced manual errors by ~50% and improved organization efficiency for both tenants and landlords.

EXPERIENCE

Full Stack Internship (Technoc)

[Lahore: May 2026 – Present]

- Developed key modules for the AICRM platform and optimized features for a live e-commerce web application.

Teacher Assistant (Fast Nukes)

[Lahore: Aug 2025 – Present]

- Assist students in understanding Database, Assembly Language and Digital Logic Design concepts.

MERN Stack internship (Code5 Technologies)

[Lahore: Jun 2025 – Jul 2025]

- Developed an admin dashboard and backend REST APIs using Node.js, Express, and MongoDB Atlas.
- Built a Resume Builder web application with AI integration (React, Node.js, MongoDB, Flask, Ollama AI).

Instructor (Polymath Kids)

[Lahore: Dec 2024 – Present]

- Teach C++ and Web development course

SKILLS

- **Languages:** Python, Java, C++, C, JavaScript, SQL (PostgreSQL, MSSQL), Assembly, JUnit
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Next.js, Spring Boot, Scikit-learn, OpenCV, Flask.
- **Tools & Platforms:** Git/GitHub, MongoDB, MySQL, JIRA, MATLAB, Ubuntu, VS Code, NLP, Adobe Photoshop, Illustrator

EDUCATION & QUALIFICATIONS

FAST- NUCES (Software Engineering Degree)

(Aug,2023-Present)

Currently in 6th semester with s GPA of 3.67/4

Keynesian institute of management and sciences (KIMS)

(2021-2023)

A-Levels: Computer Science (92% - 1012/1100 marks)

O-Levels: Sciences (92.44% - 832/900 marks)

ACHIEVEMENTS

- **Department Topper:** Secured first position and received a gold medal and cash prize for achieving the highest GPA in the Software Engineering Department. (2024)
- **Dean's Honor List:** Recognized for academic excellence (Spring 2024, Fall 2025 and Spring 2025).
- **Language Proficiency:** O-Level Exam Certificate of French language.
- **High Achiever Awards:** Received five High Achiever Awards (2018, 2019, 2021, 2022, 2023) in 8 class, o and a levels.
- **UI/UX & Design:** Certified in Advanced Graphic Designing and UI/UX from NS Training (2024).
